

RESUSCITATION WORKSHOP

RESUSCITATION BEST PRACTICES WORKSHOP

10 October 2025 | 8.30AM – 1.00PM

21/F Citimark, 28 Yuen Shun Circuit, Shatin, N.T., Hong Kong
(MTR City One, Exit D)

Register now: ssem.hk/index/registration

Course Fee:
HK\$300

**\$100 discount for simultaneous
SSEM conference registration**

FEATURED SPEAKERS

Dr. Jimmy Jot, MD
ZOLL Medical

Dr. Jimmy Jot, with experience in primary, emergency, and trauma care, shares CPR expertise and technology-driven solutions across Asia Pacific to improve clinical outcomes.

Speaker
Hong Kong

Dr WH Tsang, experienced emergency physician, shared updated information on CPR to improve resuscitation outcomes

ABOUT THIS WORKSHOP

Designed for experienced healthcare professionals who are interested in expanding their knowledge and skills in resuscitation, this half-day workshop is a unique opportunity to study the groundwork for techniques to improve the resuscitation quality bundle of care in your institution.

Key Highlights

- ✓ **Learn CPR best practices, tips and strategies** such as chest compression and ventilation techniques to achieve high-performance CPR response.
- ✓ **Learn strategies for integrating mechanical CPR device** into your resuscitation workflow, including real-world deployment tips and crew coordination techniques.
- ✓ **Understand evidence-based data collection and reporting**, and how its implementation can help with improving the quality of resuscitation in your institution.

CME / CNE ELIGIBLE

AGENDA

Time	Session
8.30 – 9.00	Welcome and Registration
9.00 – 9.10	Opening and Welcome Address from Host
9.10 – 9.30	Local Speaker Topic
9.30 – 10.00	Resuscitation Best Practices: Definitions, Clinical Evidence and Impact Potential - Clinical evidence and strategies to improve resuscitation outcomes. - Demonstrate chest compression & ventilation techniques, and strategies from top institutions on to achieve High-Performance CPR during resuscitation.
10.00 – 10.30	Resuscitation Technology Overview – Hands-On Explore latest resuscitation technologies available to help clinicians improve resuscitation performance.
10.30 – 11.00	Break
11.00 – 11.30	Mock Code and Simulation Run mock code and simulations based on various scenarios provided, focusing on the core aspects of emergency response by the resuscitation team.
11.30 – 12.00	Resuscitation On The Move Hands-on scenario-based training on using AutoPulse NXT during transport, integrating team coordination, patient movement, and continuous compressions to maintain resuscitation quality in real-world settings.
12.00 – 12.15	Importance of Performance Data Debriefing Discuss clinical evidence and guidelines recommendation on performance data debriefing and an introduction to CaseReview – a comprehensive solution for data analytics and performance debriefing.
12.15 – 12.45	Putting It All Together: Mock Codes with Data Debriefing A complete run of mock code simulation, integrating all components discussed during the workshop such as hot debriefing with CaseReview on resuscitation performance
12.45 – 13.00	Closing & Group Photo

Don't miss this opportunity to learn from experienced overseas and local instructors! Sign up for this workshop now. For more information, contact us at event@ssem.hk
